01 / SKILLS

Languages

Python, Go, Kotlin, Java, C++, JavaScript

AI / ML

PyTorch, TensorFlow Lite, OpenAI API, Whisper, Pinecone, RAG

Infrastructure

Docker, Kubernetes, Redis, Kafka, AWS, gRPC

Frontend

React, Node.js, WebSockets, HTML/CSS

02 / EDUCATION

KS Institute of Technology

B.E. Computer Science ·2023 – Present ·Bengaluru

Focus: Neural Network Architectures, System Design, Generative AI Research

03 / EXPERIENCE

Freelance Architect – Full Stack & AI Engineer

2025 – Present

- Developed bespoke automation pipelines and deployed production applications
- Reduced client data processing workload by 40% through AI-driven workflows
- Delivered end-to-end solutions across web, mobile, and cloud platforms

04 / SELECTED WORKS

Smart Lecture Assistant

Python ·OpenAI ·Pinecone ·Whisper

Autonomous NLP engine using Whisper for transcription and RAG for semantic search over university lectures.

FluxSync Engine

Go ·gRPC ·Kubernetes ·Redis

Distributed job scheduler handling 10k+ concurrent tasks with a custom Raft Consensus implementation.

SGuardian

Kotlin ·TensorFlow Lite ·Android

Edge computing fall detection system running local ML inference on Android – no network required.

Weather Wise

Node.js ·WebSockets ·AWS

Real-time weather tracker and lifestyle advisory system with live data streaming.

Made with GAMMA
